PROFESSIONAL SUMMARY

Full Stack Software Engineer with strong fundamentals in Python, Java, JavaScript, and TypeScript, seeking a Software Engineer role to build production-grade backend and frontend features. Experienced in designing REST APIs, working with SQL and NoSQL databases, and shipping full-stack applications end-to-end — from requirements through deployment. Comfortable with Git-based version control and collaborative development. Independently designed, developed, and deployed full-stack projects, integrating custom ML models and AI-powered features.

EDUCATION

Akshaya College, Puttur

Bachelor of Computer Applications (BCA), Artificial Intelligence

8.98 CGPA (2023–2026)

K S Gowda Pre University College, Ninthikal

PUC, Commerce

93.33% (2021–2023)

PROJECTS

FocusGuard – Real-Time AI Screen-Safety & Wellness App | Python, FastAPI, OpenCV, MediaPipe, scikit-learn, Ollama, JavaScript

- Built and debugged a real-time computer vision application detecting unsafe screen distance, training a Random Forest model on 240+ custom images to achieve 95% cross-validation accuracy.
- Developed a FastAPI + WebSocket backend for live camera data processing, implementing blink detection (EAR) and automated break-reminder logic.
- Designed an offline RAG-based AI assistant using ChromaDB and Ollama (Llama 3.2), delivering personalized recommendations from session data.

AI Content Creator Hub — [Live](#) | Python, FastAPI, MongoDB, REST APIs

- Built and deployed a full-stack AI content generation platform end-to-end as sole developer, automating content workflows and reducing manual creation time by 70%.
- Designed a MongoDB (NoSQL) schema for unstructured content storage and built 4 REST API endpoints serving 3 dynamic content types.
- Integrated LLM-based logic to generate contextually relevant content from user prompts, owning the architecture from backend to frontend.

BookSwap – Online Book Exchange & Selling Platform — [Live](#) | React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL, JWT

- Developed and deployed a full-stack marketplace application with a React + TypeScript frontend, supporting listings, purchases, and peer-to-peer exchanges across multi-role user flows.
- Implemented JWT-based authentication and email verification via Supabase Auth, securing access control across sessions.
- Engineered multi-parameter search and filtering using PostgreSQL (SQL), managing relational data across 3 entity tables with RLS-enforced access control.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript

Backend & APIs: FastAPI, Flask, REST APIs, WebSocket, OOP fundamentals

Frontend: React, HTML5, CSS3, Tailwind CSS, Vite, Chart.js

Databases (SQL & NoSQL): PostgreSQL, MySQL, MongoDB, Supabase

AI/ML: scikit-learn, OpenCV, MediaPipe, ChromaDB, Ollama (Llama 3.2), Prompt Engineering, NLP

Tools & Version Control: Git, GitHub, VS Code, Postman

CERTIFICATIONS

- Prompt Engineering for Developers — Vanderbilt University, Coursera (2025)
- Python Application Development — NIYO Innovation and Skills (2025)
- Cyber Security Fundamentals — NIYO Innovation and Skills (2025)

ACHIEVEMENTS & INTERESTS

- Secretary, IT Club – Akshaya College, Puttur (2025–2026): Organized technical events, workshops, and coding competitions for 100+ students, fostering peer learning and collaboration.
- 1st Place – Taluk Level Science Exhibition: Designed and presented a project, outperforming 20+ participants.
- Interests: Coding, Sports, Building innovation project.
